

1. Scope

This specification applies to flat-surfaced information cards similar to the illustrated example. These cards shall be designed for indoor or outdoor applications.

2. Size

Size shall be specified by the District.

3. Holes

Each card shall have holes as specified in the specific Material Standard.

4. Font

Copy legend shall be Helvetica-Narrow Bold, or District approved equivalent.

5. Thickness

Card material shall be 0.01" thick unless otherwise specified by the District.

6. Material

Cards shall be manufactured from tear-resistant Hop Industries Corporation Hop-Syn XT Grade Synthetic Paper, Polyester Film, or a District approved equivalent.

7. Outdoor Durability

Each card shall withstand environmental conditions encountered in the Puget Sound area of the Pacific Northwest for a minimum of 12 months without losing its legibility.

8. Packaging

Packaging requirements shall be given in the specific individual District Material Standards.

9. Identification

The following shall be marked in a District specified location, in black size 8 font: manufacturer's name or logo and District Material ID number for specific tag or card being manufactured. The marking shall not conflict with the intent or legibility of the card.
